A partnership between government, private industry, academia, and communities towards socio-economic development through information and communication technology solutions.

Expansion Celebration

Thursday, 18th April, 2013 - 10h30 - Dwesa, Eastern Cape

Join us and celebrate our "growing together", and see how the Information and Communication Technologies seed that was planted in the Dwesa community, on the Wild Coast - Eastern Cape, a few years ago has now grown into a "broadband island" that connects 17 communities in the Mbashe Municipality to each other and to the rest of the world - through the Internet, thanks to the work in concert of industry, government, communities and academia.

"... providing connectivity to our impoverished rural communities is a key priority because communication is a human right and it facilitates development ..."

[Dina Pule - Communications Minister]

SLL provides :
 - Internet connectivity
 - IT skills training
 - Software solutions
 - Computing hardware
 - ICTD research
